DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11 is allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art does not disclose or suggest an electricity control circuit, wherein during a period from when the tire condition sensor detects the condition of the tire to when the transmission circuit starts transmitting the data, the electricity control circuit performs a transmission preparation process to gradually increase electricity supplied to the transmission circuit from the battery, thereby gradually increasing a radio wave output of the transmission circuit, and wherein, if the value of the voltage detected by the voltage sensor is lowered to a lowest operation voltage of the transmitter during the transmission preparation process, the electricity control circuit limits the supply of electricity to the transmission circuit from the battery; and a receiver, which is located in a body of the vehicle and receives data from the transmitter..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such

submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
